**VARILEX® WSF 900**

**Application:**

The **VARILEX® WSF 900 Duo**

- **Angle grinder**
  - Used as a high torque angle grinder for flap discs up to 115 mm in diameter, the FIX Hook & Loop system and with the adapter for the MINI-FIX Hook & Loop system

- **Linear grinder**
  - Used as a linear grinder. The expansion roller simply screws to allow 50 mm grinding sleeves to be used (Art.-No. 65210)

- **Grinding belt roller**
  - With grinding belt roller for working on pipes (Art.-No. 65215)

- **Stationary grinder**
  - With holder for use as a stationary grinder (accessory) (Art.-No. 10009)

**Rough grinding**

Putting too much weight on the machine will damage the angle grinder and increase the discs' wear; grinding performance will suffer.

**Separating**

Never use a cutting disc for grinding. The cutting disc must have a proper cutting edge. When separating stone, a guide shoe is prescribed!

**Surface grinding**

For surface grinding use a plastic grinding disc with abrasive paper.

For removal of rust or old paint coats, we recommend to use a steel brush (saucepan brush).

**Optimum speed range**

</table>

**Measured vibration value**

The valued acceleration typically is 7 m/s²

**Usage**

This angle grinder can be used for separating and grinding many different materials, e.g. metal or stone. In case of doubt please read the manufacturer's instructions. Do not use this product in any other way as stated for normal use.

**Mains connection**

Connect only to a single-phase AC current supply and only to the mains voltage specified on the rating plate. Connection to sockets without earth protection is possible as the appliance features protective insulation to DIN 57740/VDE 0740 and CEE 20. Radio suppression complies with the European standard EN 55014. When fitting the plug, make sure that the brown (live) wire of this appliance is connected to the plug terminal marked L or coloured red, and the blue (neutral) wire of this appliance is connected to the plug terminal marked N or coloured black. Under no circumstances must the wires of this appliance be connected to the earth terminal of the plug marked either E, with the earth symbol, or coloured green or green/yellow.

**Smooth start**

The electronic smooth start will prolong the life of both the motor and the gears.

**Switching on and off**

Switching on: Push the sliding switch forward. To lock, depress the front part of the switch.

Switching off: To unlock, depress the back part of the sliding switch. The switch will automatically move back to "0".

**Electronic**

The number of revs is adjusted electronically when the load increases. In case of a longer overload period the speed is decreased electronically. The machine continues to run slowly to cool down the motor coil. After switching off and on the machine can be used at rated load. The duration of cooling-down period depends on the grade of overload.
The new ‘Quick-Lock’ cable system allows a quick change of the machines (e.g. PTX - 500).

Safety advice:
- Please pay attention to the safety instructions in the attached leaflet!
- Do not pierce the motor housing as this could damage the double insulation (use adhesives).
- Always pull the plug from the mains before making any settings or carrying out maintenance.
- Only plug-in when machine is switched off.
- Keep mains lead clear from working range of the machine. Always lead the cable away behind you.
- Before use check machine, cable, and plug for any damages or material fatigue. Repairs should only be carried out by authorised service agents.
- After switch off, the machine will not be idle immediately. (After-running of the work spindle.) Allow the machine to come to a stop before putting down.
- Never reach into the danger area of the machine when it is running.
- Always wear safety goggles and ear protectors when working with this machine. It is further recommended to wear safety gloves, apron, as well as sturdy non-slipping shoes.
- Always use the additional handle.
- Always use the protecting cap when roughing-down and separating.
- Only use tools whose permitted speed is at least as high as the highest no-load speed of the machine.
- Pay attention to the dimensions of the grinding disc. The mounting hole diameter must fit the mounting flange without play.
- Do not use reducer pieces or adapters.
- Check grinding tools before use. The grinding tool must be properly mounted and turn freely. Perform a test run for at least 30 seconds without load. Do not use damaged, out of round or vibrating grinding tools.
- Immediately switch off the machine in case of considerable vibrations or if other malfunctions occur.
- Check the machine in order to find out the cause.
- Always use and store the grinding discs according to the manufacturer's instructions.
- When grinding metal, flying sparks are produced. Take care that no persons are endangered. Because of the danger of fire, no combustible materials should be located in the vicinity (spark flight zone). Do not use dust extraction!
- Always hold the machine in a way that sparks or sanding dust fly in counter direction to your body.
- Dust that arises when working in stones with crystalline silicic acid can damage your health. Do not work on any material containing asbestos. Please note the safety regulations, VBG, of the employer's liability insurance association.
- Never use a cutting disc for grinding. Do not subject cutting discs to side pressure.
- When separating stone the guide shoe must be used!
- The adjusting nut must be tightened before starting to work with the machine.
- The work piece must be fixed if it is not heavy enough to be steady. Never lead the work piece to the grinding disk with your hand.
- In case of extreme operating conditions (e.g. when smoothing metals with the supporting disk and vulcanised fibre disks) strong contamination can build up inside the angle grinder. In such cases it is recommended to shorten the cleaning cycles and/or add a residual current operated device.

VARILEX® WSF 900

Speed selection (AG 1300-125 XE) Speed pre-selection with the setting wheel:
A = lowest speed G = highest speed

Mounting the protective cover
Open the clamping lever. Push the protective cover over the gear neck, if necessary slightly loosen the nut of the tension screw.

EASY-LOCK clamping nut
1. Secure the disc loosely and tighten by hand using the EASY-LOCK clamping nut.
2. Press the spindle lock and tighten the disc by turning it clockwise by hand. That’s all!
3. To release the disc press the spindle lock and turn the disc anti-clockwise by hand.

Fitting the working tool
Always disconnect the plug from the socket before carrying out any work on the machine.

Maintenance
Keep the machine and the ventilation slots clean.
Only use Original accessories and spare parts. Should components which have not been described need to be exchanged please contact one of our Atlas Copco service agents.

Service agents
Worldwide service by Atlas Copco. The corresponding addresses are to be found in the attached brochure.

Technical data
850 Watt, 220 – 240 V, 50 – 60 Hz. Continuous speed control by speedo generator (1200 - 4500 min⁻¹) (constant number of revs). Weight approx. 1,8 kg.

Guarantee
A 12 month guarantee (as from invoice date) is given for all technical and mechanical parts, except in the case of outside culpability.
Spares can be supplied according to the list. We will carry out necessary repairs.

Advice for operation
When grinding, do not press into the tool, but move it evenly to and fro on the work piece. For best results, hold the disc at an angle of at least 30° to the working surface.

Stand: 27. April 2015 Subject to change!

### Symbols
- Please read the instructions carefully before starting the machine.
- Always wear goggles when using the machine.
- Always disconnect the plug from the socket before carrying out any work on the machine.
- Accessory - Not included in standard equipment, available as an accessory.
- Do not dispose of electric tools together with household waste material! In observance of European Directive 2002/96/EC on waste electrical and electronic equipment and its implementation in accordance with national law, electric tools that have reached the end of their life must be collected separately and returned to an environmentally compatible recycling facility.
- Double insulated electric tool

General terms of sale and delivery for GERD EISENBLÄTTER GmbH - Spezialschleifmittel

§ 1 Scope, defence clause
(1) Our terms of sales shall be exclusively applicable; we do not accept any contrary terms or terms from resellers, purchasers and other buyers ("customers") which differ from our terms of sale unless we have expressly agreed their validity in writing. Our terms of sale shall apply even if we deliver goods to the customers without reservation despite being aware of the fact that the customer has contrary terms or terms which are different from our terms of sale.
(2) All agreements which are made between us, in other words between Gerd Eisenblätter GmbH (hereinafter known as EISENBLÄTTER), and the customer relating to the fulfilment of this contract shall be set out in writing in this contract. In addition to this contract, no other agreements shall apply unless a legal agreement has been made by mutual consent to deviate from them.
(3) Our terms of sale shall only apply to non-consumers in the sense of § 310 Paragraph 1 of the Civil Code.
(4) These terms of sale shall also apply to all future transactions with the customer if these transactions are related in type.

§ 2 Order acceptance, written form
(1) Orders must be issued to Eisenblätter in writing and shall not give rise to a contract until they have been confirmed in writing by EISENBLÄTTER.
(2) EISENBLÄTTER shall be entitled to continue to develop its products. It reserves the right to make minor technical or other changes as long as they are within a reasonable framework for the customer.
(3) The information supplied for the various products shall be for the purpose of product description only. It shall not be possible to derive a specific property or the suitability for the products for a specific purpose from such information.

§ 3 Delivery
(1) Lead times shall only be binding if they have been agreed as such in the order confirmation.
(2) If the delivery of the goods is delayed for reasons which are beyond the control of EISENBLÄTTER, in particular as a result of forces majeures, operational problems or labour disputes, the agreed lead time shall be extended for a reasonable period required to rectify this cause.
(3) The ordered products shall be delivered by EISENBLÄTTER at a price using the means of transport selected by EISENBLÄTTER, for example by parcel service, or on the basis of a special agreement.
(4) If goods are delivered to the customer, the risk of accidental loss or random deterioration of the products shall be transferred to the customer at the latest when the products leave EISENBLÄTTER's warehouse/depot. This shall apply regardless of whether the products are shipped from the place of fulfilment or who is responsible for the shipment costs.

§ 4 Terms of payment
(1) The quoted purchase price shall be binding for a period of 30 days from the date on which the quotation is submitted. Statutory value-added tax is not included in our prices; this shall be charged at the statutory rate on the date of the invoice and shown separately on the invoice.
(2) Setting off or retention against claims of all types shall not be permitted unless these claims have been finalised by a court of law, are undisputed or a decision is pending on them.

§ 5 Warranty
(1) Warranty rights assume that the customer has correctly fulfilled its duties to inspect the goods and complain about them if they are defective under § 377 of the Commercial Code.
(2) If the goods are defective at the time when the risk is transferred, the customer shall be entitled to repeat fulfilment in the form of defect rectification or the delivery of new, perfect goods at the discretion of EISENBLÄTTER.
(3) If the attempt at repeat fulfilment fails, the customer shall be entitled to demand cancellation or a reduction of the purchase price at its own discretion.
(4) Recourse claims under §§ 478 and 479 of the Civil Code shall only apply if the claim was justified by the consumer and shall only apply within the statutory framework, but shall not apply to goodwill agreements agreed with the seller. The customer must notify the seller as soon as possible of any warranty claim made by a consumer.
(5) The statute of limitations for warranty claims for defects against EISENBLÄTTER shall run for 12 months starting from the date of delivery of the goods. This shall not apply if the law set out in § 438 Paragraph 1 No. 2 (structures and goods for structures), § 479 Paragraph 1 (recourse claims) and § 634 a Paragraph 1 No. 2 of the Civil Code (design defects) specifies longer statute of limitations and in cases of death, physical injury or health impairment in the event of a malicious or grossly negligent breach of duty on the part of EISENBLÄTTER or its legal representative or agents and in the event of maliciously neglecting to disclose a defect or if a guarantee is accepted for a specific property of the product.
(6) § 6 shall apply for compensation claims.

§ 6 Liability
(1) Claims for compensation and for the reimbursement of expenses on the part of the customer (hereinafter known as compensation claims), regardless of their legal basis, in particularly as a result of a breach of duties from an obligation based on an illegal act, shall be excluded. This shall not apply in the event that a guarantee has been given or a purchase risk exists. This shall also not apply if binding liability applies, for example under the Product Liability Law, in cases of malice or gross negligence, in cases of death, physical injury or physical injury or health impairment. This shall not involve any change in the burden of proof to the disadvantage of the customer.
(2) The customer may demand compensation for the breach of major contract duties shall be limited, however, to the foreseeable damage typical for this type of contract unless gross culpability applies or in the event of liability for death, physical injury or health impairment. This shall not involve any change in the burden of proof to the disadvantage of the customer.
(3) If liability for compensation on our part is excluded or limited, this shall also apply to the personal liability for compensation of our staff, employees, colleagues, the resellers and agents.

§ 7 Reservation of title, copyright
(1) For contracts with business people, EISENBLÄTTER shall reserve title to all the supplied EISENBLÄTTER products until all claims relating to the business relationship have been settled in full. In the case of customers who are not business people, EISENBLÄTTER shall reserve title to supplied EISENBLÄTTER products until the purchase price has been paid in full.
(2) Resellers shall only be entitled to resell the products which are subject to reservation of title under § 7 No. 1 within the framework of their normal business activities. They shall not be entitled to dispose of these products by any other method or by pledging them. The reseller hereby assigns its claims accrued from the resale of the products together with additional rights to EISENBLÄTTER in order to secure all the claims accrued by EISENBLÄTTER under § 7 Paragraph 1. The reseller shall be entitled to collect the assigned claims. If seizes are made against the products subject to the reservation of title described in § 7 Paragraph 1 or if they are exposed to other action by third parties, the customer shall notify EISENBLÄTTER without delay. If the value of the securities held by EISENBLÄTTER exceeds the value of its total claims by more than 15%, EISENBLÄTTER shall release the securities of its choice at the request of the customer. If insolvency proceedings are opened against the assets of the reseller or if the reseller is insolvent or indebted, its entitlement described in § 7 Paragraph 2 shall automatically be voided.
(3) In the event of the customer acting against this contract, in particular in the event of the customer being in default or a breach of a duty set out in § 7 Paragraph 2, EISENBLÄTTER shall be entitled to withdraw from the contract and demand the return of the goods.
(4) EISENBLÄTTER shall reserve the title and any copyright to photographs, drawings, catalogues and other documents which are supplied to the customer, including quotations and documents relating to price calculations, etc. If these documents do not belong to documentation, descriptions and instructions for data processing programs for which separate contractual provisions apply, they must not be copied or disclosed to third parties without the written consent of EISENBLÄTTER.
(5) In addition the documents supplied by EISENBLÄTTER are protected by copyright. The grant of any utility rights shall require a special agreement. Under no circumstances shall it be permitted to make copies or to permit a third party to do so. This shall not include end customers who have been expressly permitted to do this by EISENBLÄTTER.

§ 8 Concluding provisions
(1) Any assignment of the rights or transfer of the duties set out in this contract shall require the prior written consent of EISENBLÄTTER.
(2) If a provision in these terms of sale and delivery should be or become invalid, the other provisions shall not be affected.

§ 9 Place of jurisdiction and applicable law
(1) If the customer is a businessman, legal entity under public law or a special fund under public law, our registered business address shall be the place of jurisdiction. However, we shall also be entitled to sue the customer at his home address. The same shall apply if the customer does not have a general place of jurisdiction in the Federal Republic of Germany or his place of abode or normal place of residence are not known at the time when the lawsuit is lodged.
(3) Unless specified to the contrary in the order confirmation, our registered business address shall be the place of fulfilment and payment.

Date of issue: November 2008
