Gerd Eisenblätter GmbH, Geretsried (Germany) – March 2020

---

Dear Eisenblätter customers and partners,

due to the current situation in connection with the rapidly spreading corona virus, there is uncertainty everywhere. At Eisenblätter, too, we take all the necessary precautions to protect our employees, customers and suppliers as best we can.

All of our products are currently available for delivery! Thanks to an increase in raw material stocks, our production is secured until further notice.

An important aspect in our corporate philosophy has always been to obtain raw materials from our own country. In order not to become dependent on international raw material suppliers. We also always put our own ideas and developments into production. A good example of this are our specially made carrier plates made of natural fiber. Instead of relying on fiberglass backing plates from the Far East, we have been using a backing plate for many of our discs for many years, which not only guarantees technical advantages when grinding. In addition, glass fiber emissions at the workplace are avoided, which benefits the environment and users alike.

We thank you for your trust and wish you and your employees all the best and much health.

Yours sincerely,

Gerd Eisenblätter  
CEO Gerd Eisenblätter GmbH
